**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fumiyasu et al (JP 07162990 A) in view of Olsson (US 5,913,178).

Regarding claims 1, 3, 4 and 6, Fumiyasu et al (hereafter Fumiyasu) disclose the claimed speaker apparatus in Fig. 2 with the exception of the microphone being placed at a position where the at least one of second and higher pipe resonance of the pipe, and/or at least sound pressure of resonance is low enough not to cause oscillation.

Olsson teaches that a pipe would cause oscillation due to resonant frequencies. By placing microphone at selected location, Olsson teaches that this problem would be minimized. Thus, it would have been obvious to one of ordinary skill in the art to modify Fumiyasu's speaker apparatus by placing the microphone at a position as taught in Olsson in order to minimizing the oscillation picked up by the microphone.

Regarding claims 2, 5 and 7, although neither Fumiyasu nor Olsson shows a bracket for mounting the microphone, one skilled in the art would have expected that the microphone would work equally well by using any well known fastening means, including a bracket.
